### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) Responsive to communication(s) filed on 10 September 2007.
- 2a) This action is **FINAL**.                                   2b) This action is non-final.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-9, 26-36 and 48-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marouiss et al. (2001/0048899).

Mauouiss et al. teach an integrated sample processing system(500) comprising a plurality of modules further comprising at least one sample input/output site(502), a transport module(504), a fluidics module(506) and an analysis module(508). Paragraph[070] teaches sample holders that have been read on the claimed "substrate mount for receiving a substrate". Paragraph[0105] teaches a transport module for the movement of the sample holders that has been read on the claimed "a touch system for positioning the substrate". Paragraph[0158] teaches a fluidic module for the dispensing of fluid to the sample holder that has been read on the claimed "dispensing device". Paragraphs[0218-0223] teach the rotation of the dispensing device which has been read on the claimed "dispensing device is adapted for translation alone a y-axis and for rotation about a central axis ...". Paragraphs[0268+] teach an optical system that has been read on the claimed "optical system". Paragraph[0324] teaches control of the sample holders/microplate by optical analysis.

***Response to Arguments***

Applicant's arguments filed 9/10/07 have been fully considered but they are not persuasive.

Applicants' state Marouiss et al. fail to teach the claimed two optical systems that position a substrate mount. The Office maintains the claimed "optical system" is sufficiently broad to have been properly read on the taught "imaging device such as a camera" by Marouiss et al.

Applicants' state Marouiss et al. fail to teach the claimed "dispensing device". The Office maintains the instant claim language "dispensing device" is sufficiently broad to have been properly read on the dispensing device described in paragraph [0218] of Marouiss et al.

Applicants' argue all of the dependent claims are allowable because the independent claims is allowable. The Office maintains all of the rejections of record are proper.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
